[X] Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Introduction

Norfolk Southern Corporation is a Norfolk, Virginia based company that owns a major freight railroad, Norfolk Southern Railway Company. Norfolk Southern Corporation was incorporated on July 23, 1980, under the laws of the Commonwealth of Virginia. Our common stock is listed on the New York Stock Exchange (NYSE) under the symbol “NSC.”

Unless indicated otherwise, Norfolk Southern Corporation and its subsidiaries, including Norfolk Southern Railway Company, are referred to collectively as NS, we, us, and our.

NS is primarily engaged in the rail transportation of raw materials, intermediate products, and finished goods in the Southeast, East, and Midwest and, via interchange with rail carriers, to and from the rest of the United States. NS also transports overseas freight through several Atlantic and Gulf Coast ports. We provide comprehensive logistics services and offer the most extensive intermodal network in the eastern half of the United States.

In support of our rail transportation services, we operate several facilities (the “Repair Facilities”) that are capable of providing repair services for our own fleet of locomotives and roadway maintenance equipment. The Repair Facilities also offer and provide these repair services to third-party customers from time to time. Such repair services may include the fabrication of components, the use of components from our inventory that have undergone in-house reconditioning and/or the assembly of machinery involving the use of tin, tungsten, tantalum and/or gold (“3TG” or “conflict minerals”). For purposes of Section 1502 of the Dodd-Frank Act (defined below), we have assumed that these activities constitute the manufacturing of products as contemplated thereby. The payments received from customers in return for our repair services in 2015 represented an amount equal to less than 1% of our operating revenue.

Applicability of the conflict minerals rule to NS

In 2013, NS undertook a broad-based assessment of its business operations (the “Enterprise Assessment”) in order to determine whether or not it was subject to Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act). Based on the Enterprise Assessment, we concluded that certain activities historically conducted at Repair Facilities could be deemed to constitute the manufacturing of products under the Dodd-Frank Act. NS business activities in 2015 did not deviate from the results of the Enterprise Assessment.

NS undertook a detailed assessment of actual business activities at the Repair Facilities for the 2015 reporting year. We concluded that there were projects undertaken at one of the Repair Facilities that involved the transfer to third-party customers of certain locomotive components that were taken from NS inventory after undergoing in-house construction or reconditioning (the “CM Projects”) potentially involving the use of one or more conflict minerals.

We then undertook a Reasonable Country of Origin Inquiry (RCOI) with suppliers who provided materials used in the CM Projects that had the potential to contain 3TG (the “Relevant Suppliers”).

NS’s policy regarding the sourcing of conflict minerals can be found here:

http://www.nscorp.com/content/dam/nscorp/suppliers/conflict_minerals_statement.pdf.

Section 1- Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

a. NS has concluded in good faith that during the 2015 calendar year:

Based on the RCOI conducted, NS had no reason to believe that 3TG in any of its products may have originated from the Democratic Republic of the Congo or an adjoining country (Covered Countries). We therefore are not required to file a Conflict Minerals Report for 2015.

b. Description of RCOI Process

i – Applicability assessment

As the first step prior to beginning the RCOI process, NS evaluated the specific business activities at the Repair Facilities in 2015 to identify whether any of those activities could be considered manufacturing of products under the conflict minerals rule. After identifying the CM Projects, we developed a list of three Relevant Suppliers and surveyed the Relevant Suppliers with respect to the content and origins of any 3TG in their products sold to us.

ii – Engagement with supply chain

Following the applicability assessment process, we sent surveys to the three Relevant Suppliers. The Relevant Suppliers were surveyed using Version 3.02 of the Conflict Minerals Reporting Template (the “CMRT”) developed by the Conflict Free Sourcing Initiative.

Initial surveys were distributed to the Relevant Suppliers starting in October 2015. Follow-up with the Relevant Suppliers occurred from December 2015 to January 2016. NS also has maintained a dedicated email address for supplier questions about the conflict minerals rule or for assistance in completing the CMRT.

Given the annual compliance requirements, and in an attempt to improve transparency in the supply chain and future supplier response rates, NS is continuing to integrate updated terms and conditions related to conflict minerals in its supplier contracts, requiring each supplier to comply with any conflict minerals requests from NS and inform NS if any of its products contain conflict minerals.

iii – Survey Response Review

NS reviewed responses received for “red flags,” defined by NS as inconsistent, incomplete, or inaccurate responses. This red flag review was based on logical tests applied to information provided by Relevant Suppliers in the CMRT. None of the responses failed any of the red flag review tests.

iv – Non-Responsive suppliers

All Relevant Suppliers responded to the survey.

c. Results of RCOI

NS received responses from all three Relevant Suppliers. One of the three Relevant Suppliers indicated that its products contained 3TG (the “3TG Supplier”). The 3TG Supplier further indicated to the satisfaction of our legal review that it sourced 3TG from countries other than Covered Countries. The remaining two suppliers indicated that their products did not contain 3TG.

d. Hyperlink to Form SD

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, NS has filed this Specialized Disclosure Report (Form SD) on its publicly available Internet site at <http://www.nscorp.com/content/nscorp/en/get-to-know-norfolk-southern/investor-relations/financial-reports/sec-filings.html>.

Signature

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.
